Quarter 4 - National and North

Source : HSCIC Quarterly published data Q4. HSCIC Website IAPT: <http://www.hscic.gov.uk/iapt> Q4 data (provider and commissioner):

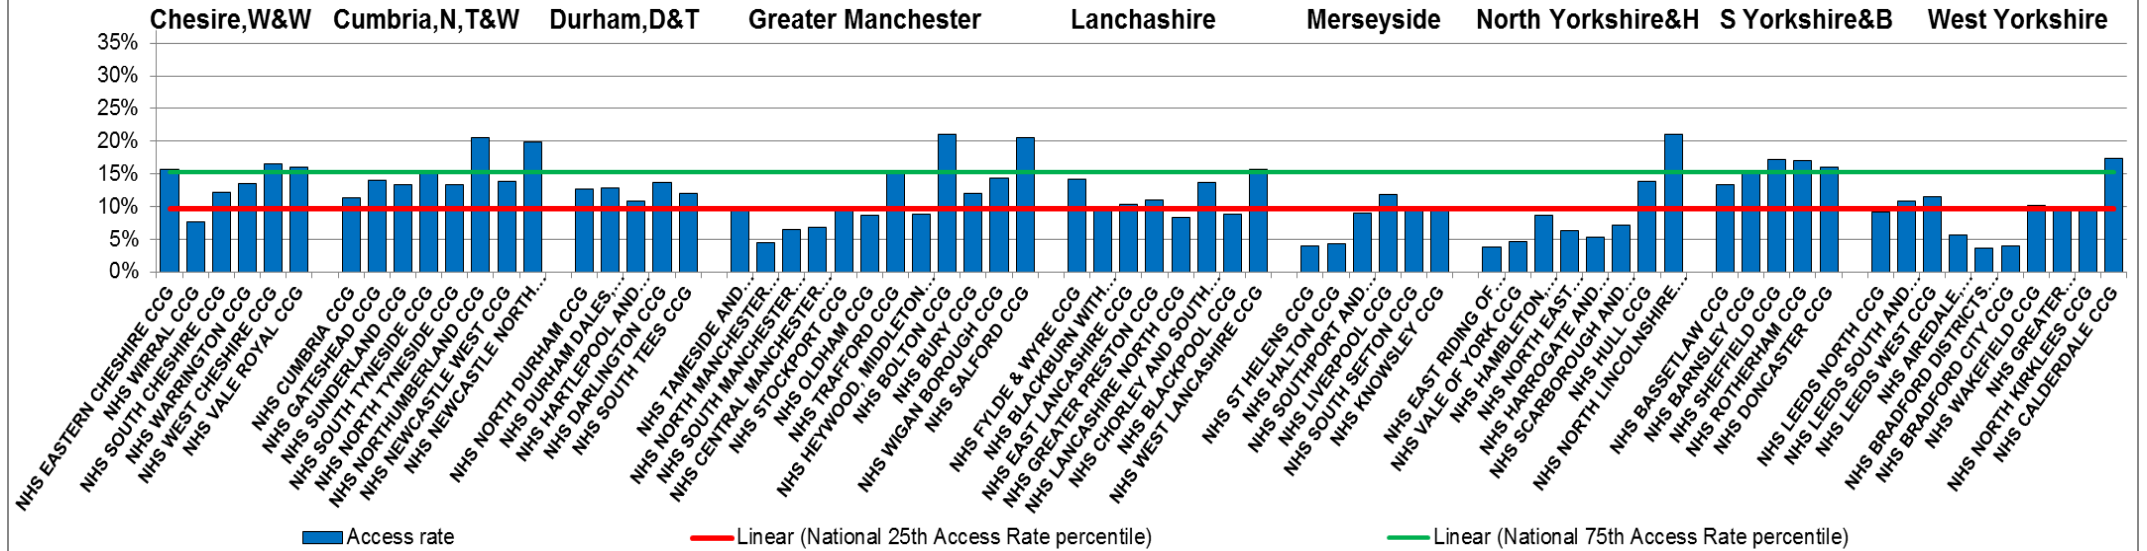

<http://www.hscic.gov.uk/searchcatalogue?productid=14126&q=Improving+Access+to+Psychological+Therapies&sort=Relevance&size=10&page=1#top>

The tables below are not part of the HSCIC publication above but have been derived from this data and are presented in a way that we hope will help you understand local health communities' performance and challenges. *Please note that the quarterly published data relies on a valid CCG code being entered at patient level to enable data to be allocated to a CCG.*

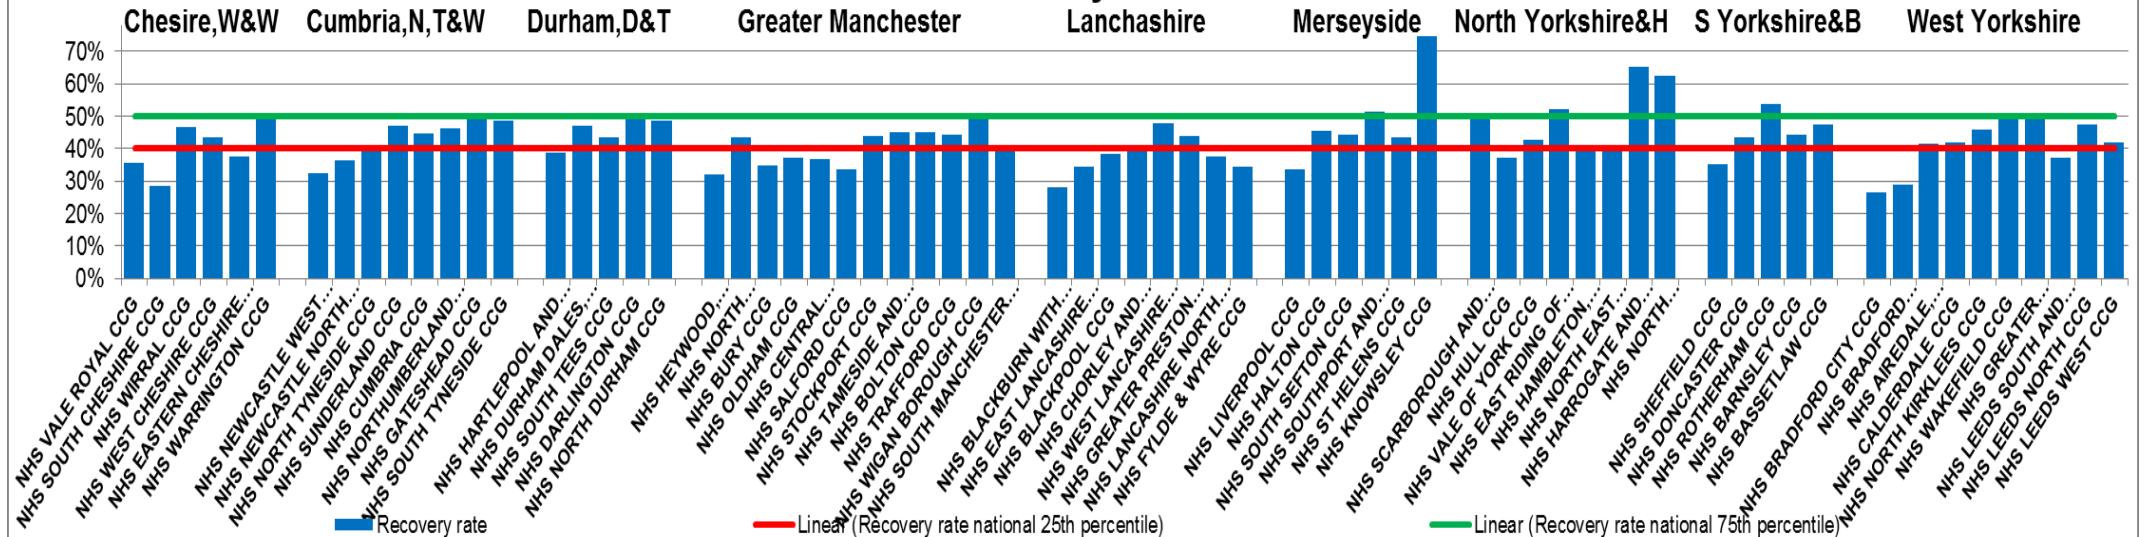

Satisfactory delivery of the overall IAPT mandate commitments for adults is reliant on good access and recovery data. Q4 was the fourth quarter that the new IAPT minimum data set (MDS) has been published by the HSCIC and local and national performance has been derived from the MDS. It is acknowledged that there have been problems with accuracy and completeness of these data. CCGs and providers have been asked to ensure that their nationally reported data matches the data they submitted and their local view of performance. All remaining data queries should be addressed to the HSCIC enquires@hscic.gov.uk (FAO IAPT team). The national IAPT team can also be contacted on iapt@nhs.net

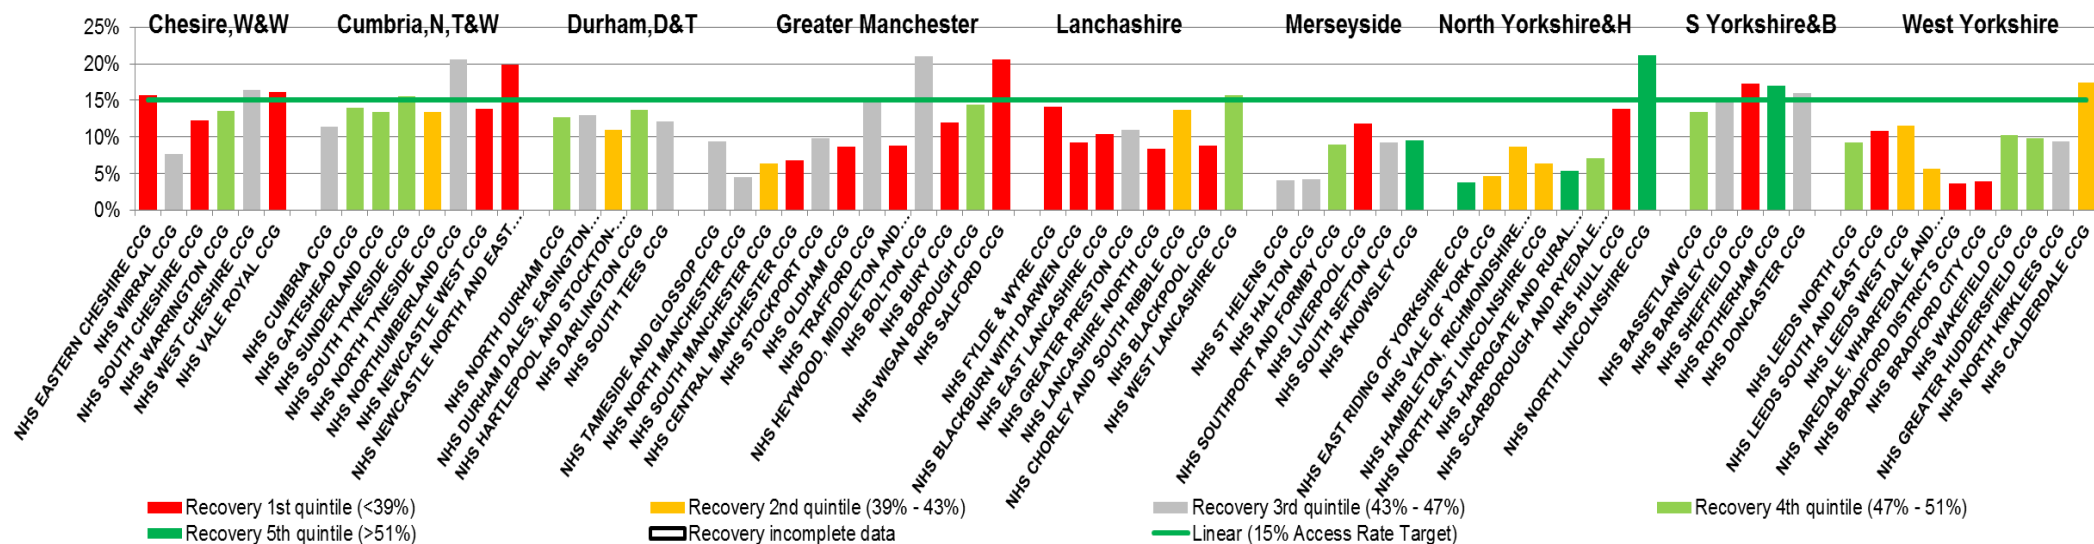

Access Rate

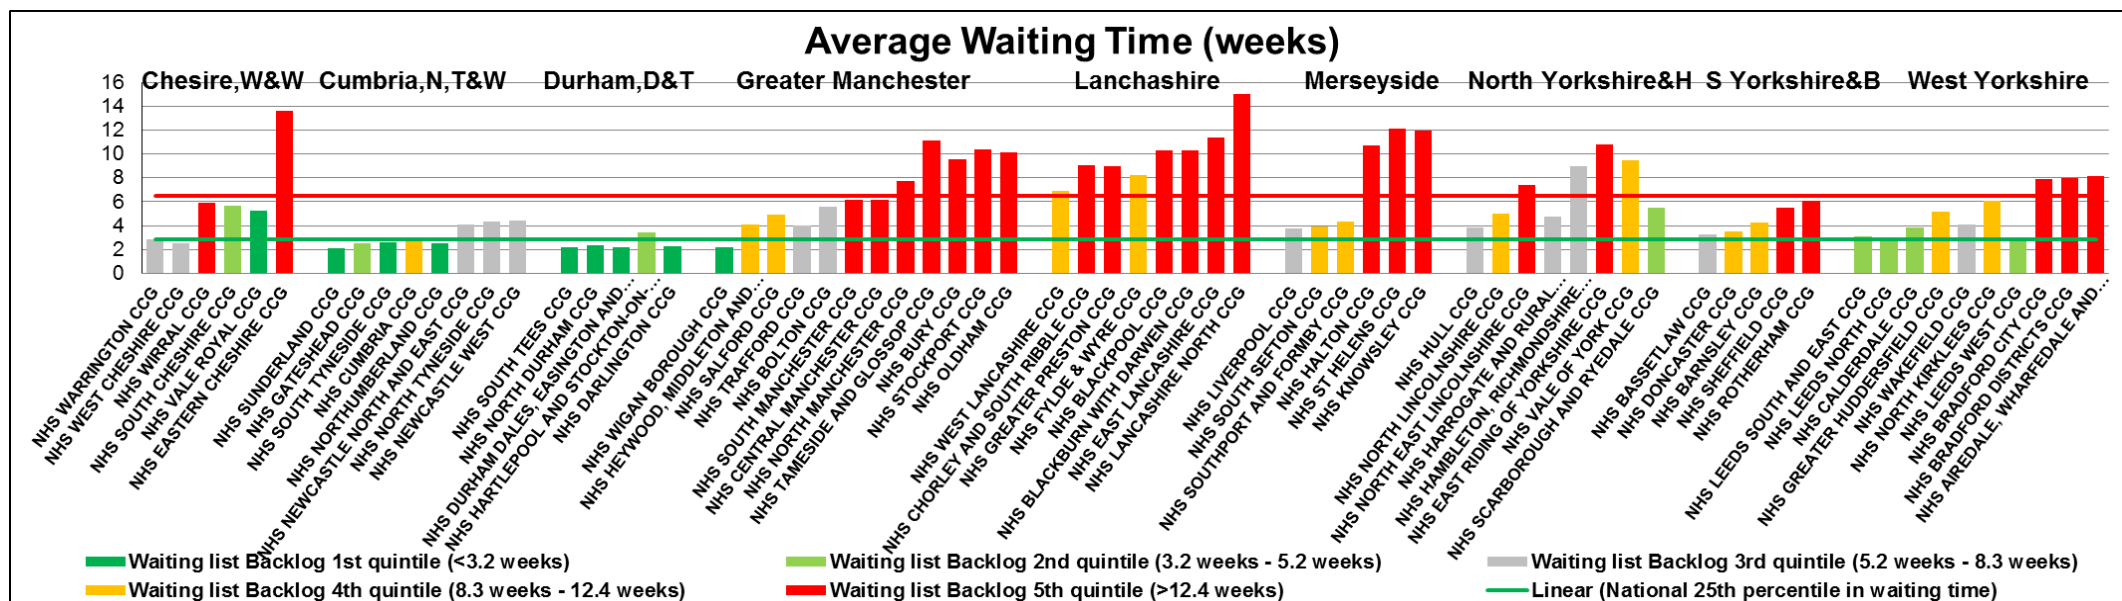

Recovery Rate

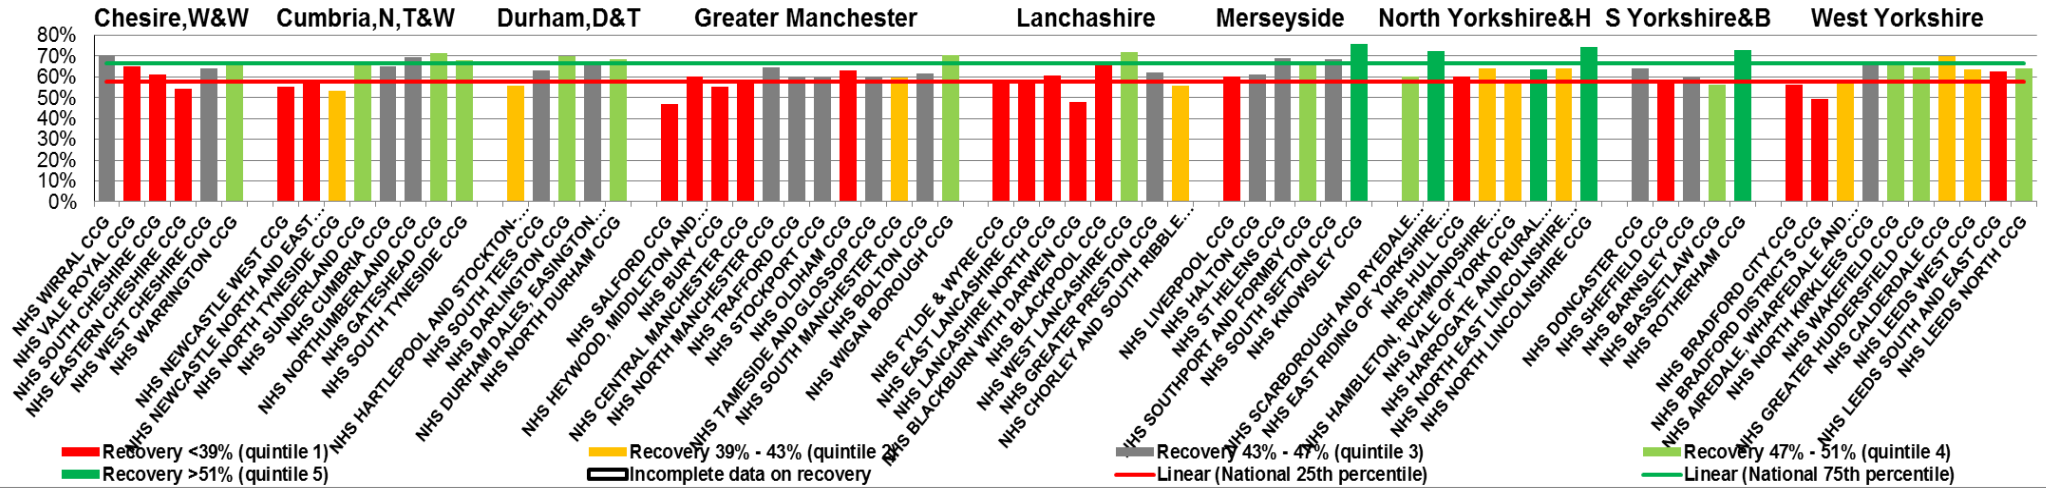

Access Rate (with recovery rate quintiles)

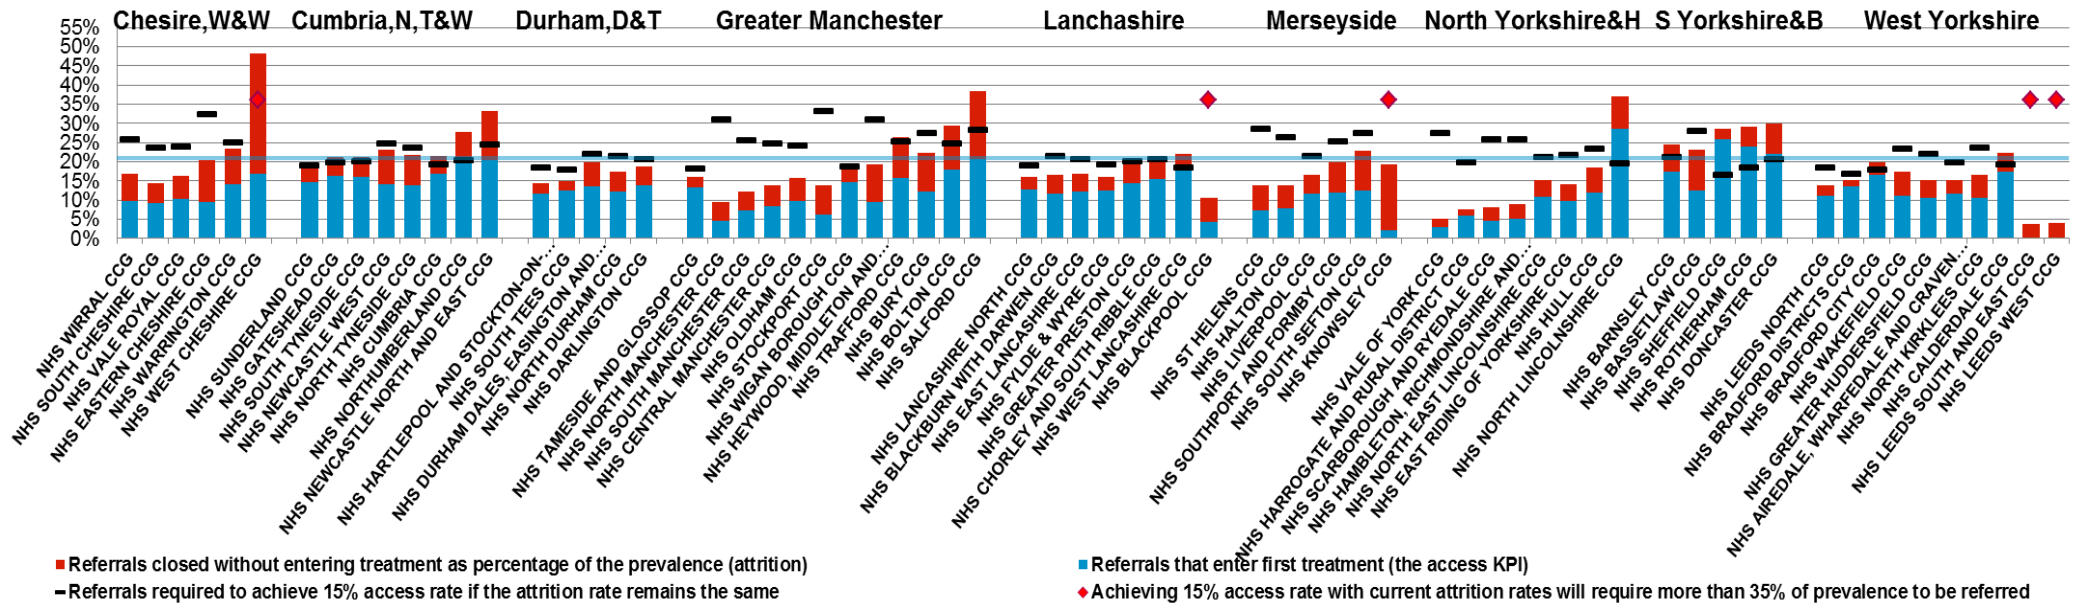

Average Waiting Time (weeks)

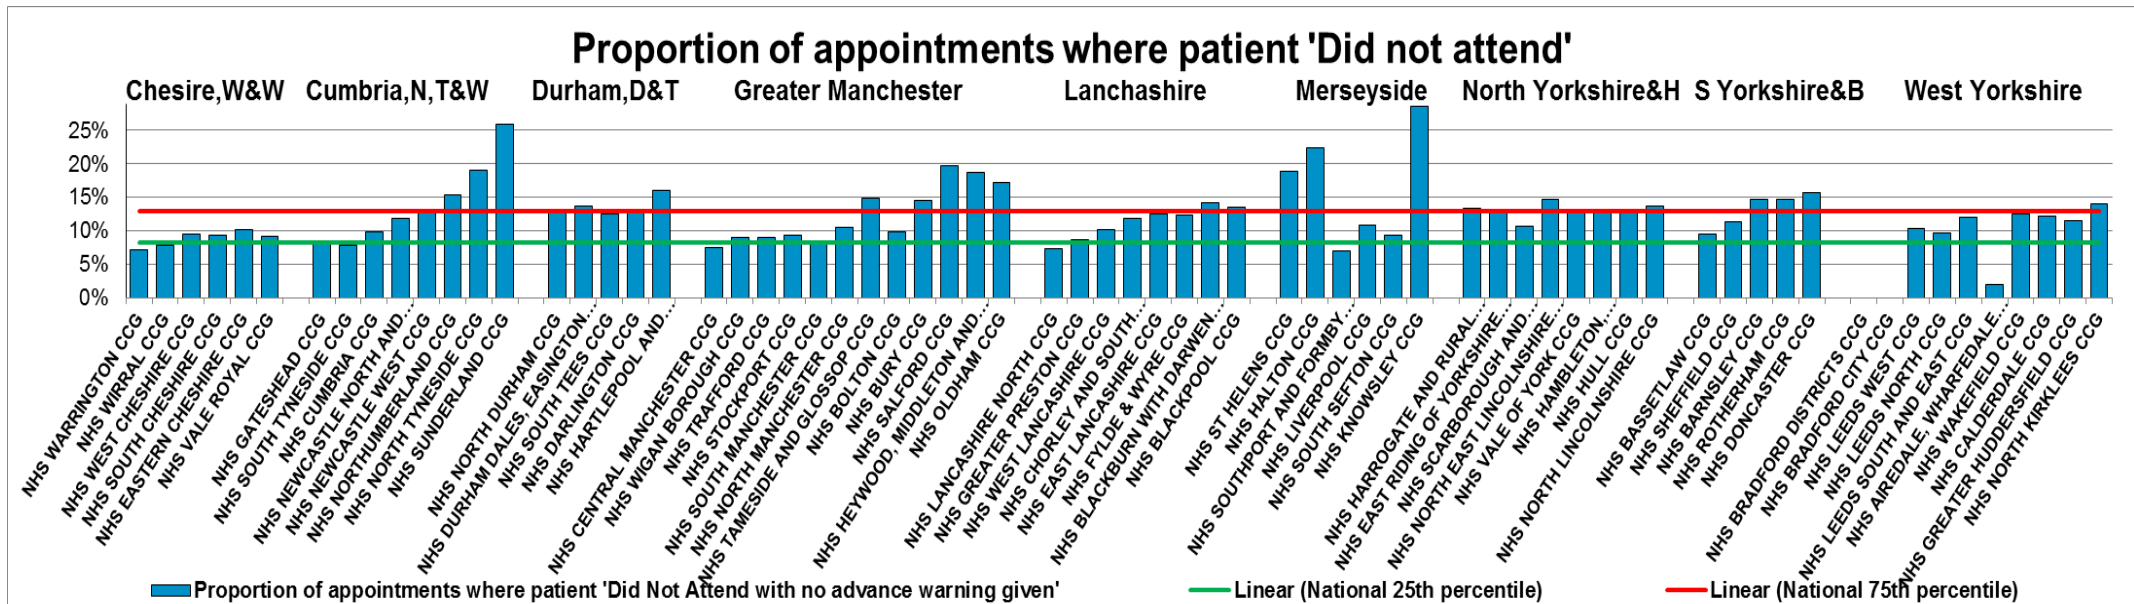

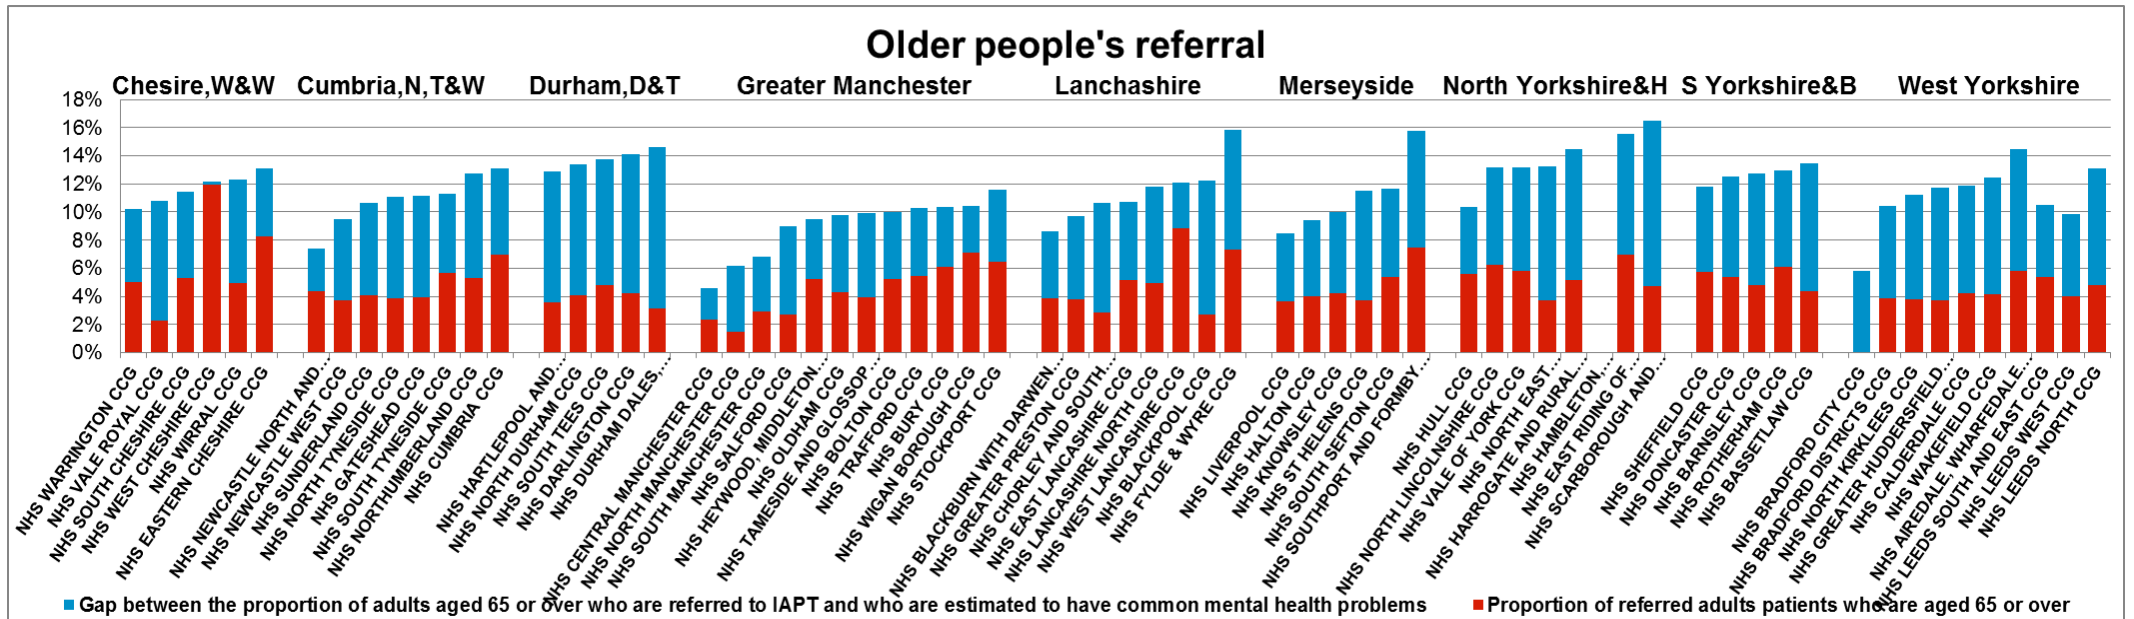

Reliable improvement rate

Referral and attrition rates

CCG			Referral rate (as percentage of the prevalence times 4)	Attrition: Referrals closed without entering treatment (as percentage of the prevalence times 4)	Net referral rate	Access rate (times 4)	Recovery rate	Reliable improvement rate	Proportion of referred adult patients who are aged 65 or over	Waiting time from referral to first treatment	Proportion of appointments where patient 'Did not attend with no reason given'
Organisation	AreaName	RegionName	ReferralRate	Attrition	NetReferralRate	Access	RecoveryRate	Reliable	Over65	AverageWaitingTime	DNARate
